

EPDM Silicone Custom Injection Molded Rubber Parts

Power Facilities Silicone Rubber Parts are increasingly the materials of choice for electrical power grids because they offer high mechanical and insulation properties, ensure heat and fire resistance and can be used for a wide range of cabling applications in various sectors: utilities, construction, railways, urban lighting, rapid electrical vehicle (EV) charging stations and so on.

Product Parameter of the EPDM Silicone Custom Injection Molded Rubber Parts:

- ① Product name: **EPDM Silicone Custom Injection Molded Rubber Parts**
- ② Material: EPDM NBR Silicon or Can Custom
- ③ Logo: Can Custom
- ④ Size: Can Custom
- ⑤ Can Custom: Black or custom
- ⑥ Application: Automotive
- ⑦ Certifications: IATF16949 ,ISO14001:2015,ROHS,CMC, etc
- ⑧ Delivery: 30 -50days after sample confirmation
- ⑨ Sample: 25-30 days
- ⑩ Payment: 30% deposit, 70% payment before shipment
- ⑪ Package: PE bags, Cartons,Pallet
- ⑫ Payment Terms: T/T,L/C and so on.
- ⑬ Shipment Way: Vessel,Air,Express etc.

Product Feature AND Application of the EPDM Silicone Custom Injection Molded Rubber Parts:

Electric silicone rubber insulator parts including drive shaft assembly and install the turn arm, installed moving contact knife in turn arm segment, assemble the shaft section along the or so direction outspread, assembly of the shaft axial ends respectively used for single-phase moving contact with adjacent cutter unit or install the corresponding connection shaft end connection head, left side connecting head and/or the right end connected to the socket structure, The inner hole wall of the jack structure is provided with an inner spline structure, and the inner spline structure has a spline keyway evenly distributed along the circumferential direction, and the spline keyway is a shrinkage slot structure.

Using the shrinkage groove structure to form the raised lock card positioning, avoid the raised single-phase moving knife unit or installation shaft end appears large shaking, so that the single-phase moving knife unit is firmly connected, so as to effectively avoid the single phase moving knife unit buckle loose problem.

Packaging & Delivery:

Packaging Details: plastic bags or carton boxes

Q1. Which kind of product do you produce?

Kingtom: Rubber injection parts, rubber compression parts and rubber extrusion parts, rubber-metal parts, plastic parts.

Q2. What information do you need for making price?

Kingtom: 1. 2D/3D drawing, or samples photo with detail size.

2. Material And Material hardness

3. Detail quantity

4. Your other requirements like tolerance, surface treatment.

5.Product usage environment

Q3.I don't have 3D drawing,how should i do ?

Kingtom:You can send one sample to us,then we can produce as your sample.

Q4:How to make sure the quality?

Kingtom:Check the samples before mass production.

There is the detail inspection report and goods photos before shipping.

Q5.Do you provide samples?

Kingtom:Yes,samples is free and you just pay the express cost.

Q6.How is the delivery time?

Kingtom:It usually takes 10-30days.It depends on the orders.
